LANGUAGE LAB & AURAL ORAL ENGLISH LAB

Language lab & Aural Oral English lab is used to equip students with good communication skills and face the interviews with confidence. It aims at developing the correct pronunciation, intonation and accent and acquire LSRW skills in English language.

LANGUAGE LAB

With the objective of polishing and perfecting heterogeneous language skills of the students, a Language Lab was established through financial aid from UGC.

This lab enhances the language use of the students with varied exercises and activities based on real context in a sophisticated ambience.

The infrastructure of the Lab is extended to all students on a triangular basis with the Internet and the Library.

During the pandemic the activities of the Labs (Language Lab & AOEL) were incorporated in the Part II English Classes in online mode.

The Lab resumed with the offline activities on the rotational basis with the library.

The Lab Instructors train the students in their language skills allied with employability skills like Group Discussion, Presentations, Role Play etc.

The Lab Coordinators coordinate with the other instructors in formulating the week activities.

AURAL ORAL ENGLISH LAB (AOE LAB)

AOE Lab (Aural Oral English Lab) is an initiative designed to help the students achieve Communication Skills which focuses on pronunciation, fluency and increase in vocabulary. It is an aid provided by the College Governing Council, aiming to enhance fluent English communication skills for all the students of the institution.

AOE Lab is fully furnished with IT tools to practice and assess students' proficiency in English.

Title: Establishment of Language Lab Report

Cauvery college for women, attaining autonomy, has ventured to refurbish practices and policies in accordance to the need of preparing scholars to be utilitarian members of the society. With the same focus the management and the principal unanimously decided to initiate plans to develop the communication of its wards to empower them as a better work force. Following which a team of members (Dr. A. Suganthi Rao, Dr. Prema Joshua, Dr. S. Jayashree Agarwal, Ms. P.R. Durga Devi and Ms. K. Anitha) were chosen from the Department of English in revamping the language lab.

The team had strategized a plan and the first step involved in identifying the learner level of the students by administering a diagnostic test. Secondly, a study was made to analyse, the contemporary programs used for communication development, which were followed by other competitive intuitions. Recorded feedback from the students of various colleges; helped the team to shortlist Linguaphone English Today offered by AIMS Education Center (British Council Training Partner), Management held discussions with the aforementioned service provider and the team to scrutinize the quality, viability and the cost effectiveness of the product and found the product and service to be an expedient

The management had organized a demonstration for the heads of various departments and an exclusive session for the members of the department of English to clarify queries regarding the product and service. A satisfactory response from the participants helped the team and the management to negotiate pecuniary terms and conditions with AMS Education Centre.

English is a business language. Today students must be efficient in spoken English which is the key to achieve our target. This is yet another practice of the institution to affirm that the wards regularly and equally access the plethora of resources available in the Net Library/Secondary English Lab. The allocation of hours is in a triangular basis, where the ward gets the experience of attending all the classes functioning in a triangular model.

The AOE Lab (Aural Oral English Lab) is an initiative different from the contemporary institutions. It is an aid provided by the college governing council, aiming to enhance fluent English communication skills for all the students of the institution.

Self Confidence Plays vital role in Speaking English language if they have a notion that they cannot speak English Language. Fear of Committing mistakes, hesitation to face audience, lack of practice and unaware of new sentence formations are the reasons. This Triangular basis process enable them to pick up the LSRW skills fast.

Objectives:

- To induce confidence to English well
- To improve vocabulary status.
- To excel in their future career.

Outcome

- Easy to follow the joy of learning Spoken English.
- Started conversing in effective ways
- Improvement of the personality and soft skills development among the students.

Practice

Students are made to attend Library, NET LAB and Language Lab every week. Aural Oral English Lab is specially meant for first year students. weekly twice they attend the lab hour. Proper lab schedule is prepared.

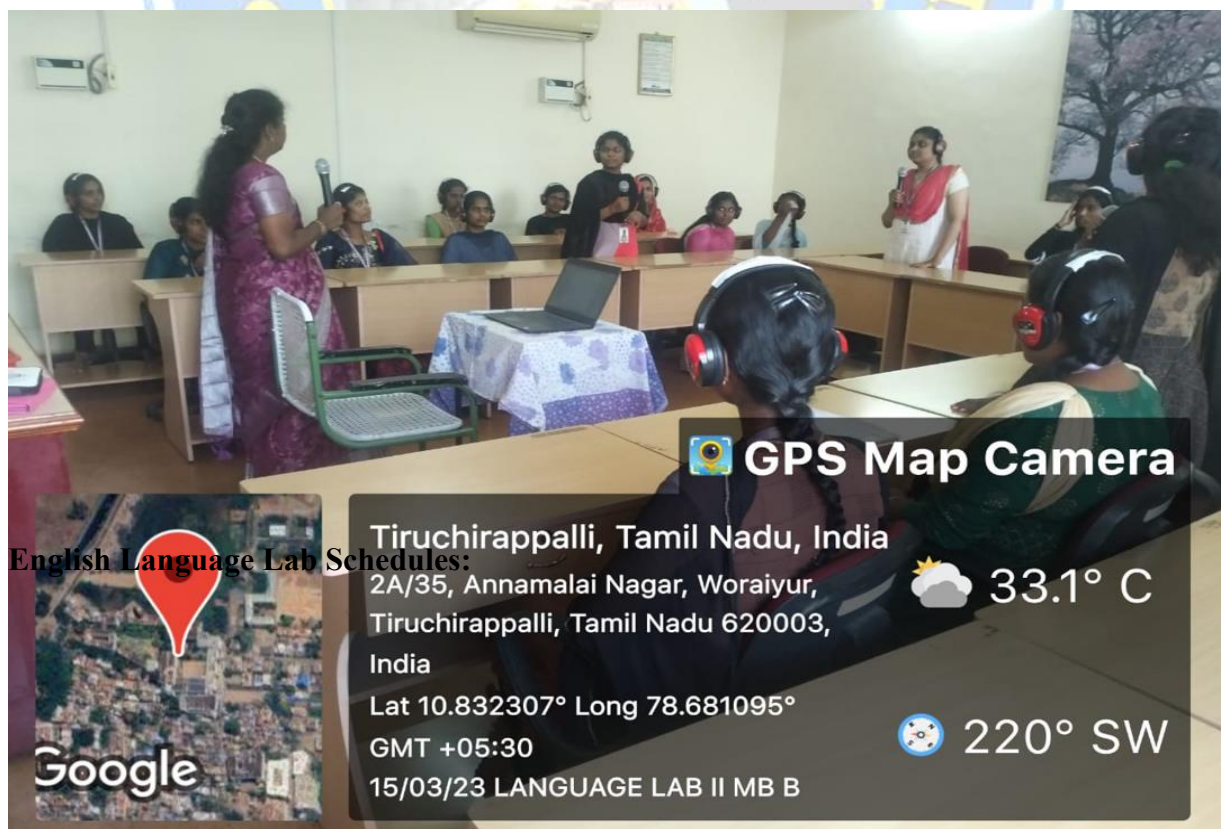

The standard curriculum of the AOE Lab is an integration of Part-2 English syllabus. Thus, ensuring continuous practice and evaluation. Furthermore, the lab and devices used in it, exclusively serve the purpose of enriching the Listening, Speaking and the Reading skills. Students were trained to develop their LSRW skills and as a result they created PPT by themselves.

MOTIVATIONAL SESSION FOR TNPSC AND UPSC ASPIRANTS

The screenshot shows a Google Meet window. At the top, there's a navigation bar with browser tabs and meeting controls. Below it, a banner states "You have extensions installed that may affect the quality of your call". The main area displays a presentation slide from "EIT Madurai" titled "DERMATOLOGY". The slide content includes:
I. INTRODUCTION
The skin and its accessory organs (hair, nails, and glands) are known as the **integumentary system** of the body. Integument means covering, and the skin (weighing 8-10 pounds over an area of 22 square feet in an average adult).
FUNCTIONS

- Act as a protective membrane over the entire body; the skin guards the deeper tissues of the body against excessive loss of water, salts, and heat and against invasion of pathogens and their toxins.
- The skin contains 2 types of glands that produce important secretions. These are the **sebaceous** and the **sweat glands**. The sebaceous glands produce an oily secretion called sebum, and the sweat glands produce watery sweat.

On the right side of the screen, a grid of participant tiles is visible, including EIT Madurai, Nivedha R, sathiya bt, ramya bt, priyadharshini11 bt, sri varshini bt, sindhuja mb, 65 others, and You. At the bottom, there's a red "Track Attendance" button and various meeting controls like mute, video, chat, and end call. The Windows taskbar at the very bottom shows the time as 7:52 PM and the date as 10-03-2023.
